## CRANE TRUCKS

# CRANE TRUCKS FOR SALE IN AUSTRALIA

Why get two vehicles for lifting and carrying loads when you can do both with just one? A crane truck is equipped with a crane to lift or lower objects. You can easily carry and transport heavy materials, plant and equipment between places with this simple yet highly functional vehicle, making it ideal for Australian mining and construction industries.

Looking for sturdy crane trucks to do the challenging work for you? Plantman Equipment has a wide range of crane trucks with robust features and specs to fulfil your unique industry requirements. Discover why Plantman's crane trucks are the best in the Australian market.

## FLEXIBLE TRUCK OPTIONS

Plantman Equipment has been designing and building crane trucks for over 30 years for the Australian commercial and mining industries. We know how industrial needs vary from company to company. You can purchase or hire from a range of high-quality and customised crane trucks to meet your exact project requirements.

Choose between various:

- Chassis brands, models and sizes
- Truck styles (Flatbed, Tilt Tray or Hiab Crane Truck)
- Front or rear crane mounting
- Weight and engine capacity
- Number of axles

## PERFORMANCE GUARANTEED

The Plantman service vehicle fleet is designed and manufactured by our team of experts in our Perth-based manufacturing facility using only locally sourced parts and materials, with every piece of equipment built right here on Aussie soil.

Our Hiab crane trucks are designed to meet both Australian standards and our high-quality requirements. For years, we have been providing mining communities internationally with these top-notch crane trucks that ensure safe transportation of materials from one place to another.

# FEATURES OF PLANTMAN'S HIGHLY FUNCTIONAL CRANE TRUCKS

Plantman offers the best solution for your crane truck requirements. The highly functional features guarantee optimal performance and safety. With vast experience and expertise in the mining industry on our side, you can be assured that your needs will be met.

Here are some features of our highly functional crane trucks.

## Flexibility

With our versatile crane trucks, you can handle any job no matter how big or small. Our custom-built crane trucks are designed to lift from 990kg to 10 tonnes, making them perfect for all sorts of projects. They also come in different sizes with flat or tilt trays.

## Automatic Transmission

Through automatic transmission technology, the operator doesn't have to worry about shifting gears manually. It enables smoother and more manageable operations, making it more fluid than a crane truck with traditional manual units.

## Mine Spec Customisation

In an industry where safety is always a concern, our customised Mine Spec vehicles ensure that employees and cargo are safe from any dangers on site. You can get crane trucks with particular mining specifications depending on your location and mine type.

## ADVANTAGES OF CRANE TRUCKS

Your business can benefit from these advantages that come with a crane truck.

- It's cheaper than a separate truck and a crane.
- If you don't require a crane, you can still put the truck to good use as it is versatile and sturdy.
- The truck can be driven or transported to remote worksites without difficulty.
- Crane trucks with less than 10 tonnes capacity can be operated simply with a heavy vehicle licence. For higher capacities, operators require a **Vehicle Loading Crane high-risk work licence**.

## WHERE CAN YOU USE HIAB CRANE TRUCKS?

Crane trucks are generally used in the Australian mining and construction industries. However, it's not limited to those industries. Regardless of how small or large a project you've got, crane trucks are versatile enough to meet your lifting and transport requirements.

Our range of trucks is easy to use and feature excellent operational control, including remote operation if required. Our customers regularly use their trucks for:

- Mining, civil & construction projects
- Council and commercial applications such as transport, salvage and landscaping
- Local and remote railway construction and maintenance
- Rural and farming applications

## THE BEST CRANE TRUCKS IN AUSTRALIA

Plantman Equipment is proud to provide the best crane trucks for sale in Australia and beyond. Our crane trucks, be it flat-bed, tilt-tray or Hiab, are explicitly designed with the needs of the mining, construction and transportation industries in mind.
