DIESEL FUEL TANKERS

PERFORMANCE
GUARANTEED

Looking for a tough, reliable tanker that can handle even the most strenuous jobs? Look no further than Plantman Equipment's Diesel Fuel Tankers.

The entire Plantman service vehicle fleet is designed and manufactured by Plantman Equipment in its Perth-based manufacturing facilities using locally sourced, high-grade raw materials and parts. Hence, you can be sure they're up to the task.

Our vehicles are designed to meet Australian mine specification standards as well as the company's own high-quality requirements that have seen the company provide to the international mining community for over 28 years.

FEATURES OF PLANTMAN'S HIGH-END DIESEL FUEL TANKERS

Plantman Diesel Fuel Tankers are versatile custom-fit for any mining or construction operation. These come with many performance and safety features, making the job easy and safe for the drivers and operators.

Here are some features that make Plantman's diesel fuel tanks the best in the Australian market.

Diverse Range

We have diesel fuel tankers with diverse capacities to meet your needs. Our custom-built tankers come in different sizes weighing from 10,400 kgs to 28,500 kgs. These fuel trucks are built to hold from 3,000 litres to 18,000 litres, making them useful for various projects, small and large.

Automatic Transmission

The operator doesn't have to worry about shifting gears with automatic transmission technology, which makes operating a Diesel Fuel Tanker much easier and more fluid than with traditional manual units.

Zero Spillage

Plantman's zero spillage concept ensures safety by preventing spilled fuel, oil or water. It makes refueling efficient and eliminates all risks of accidents to keep your workplace hazard-free.

Certified Internal ROPS

Heavy vehicles take on big jobs in sometimes dangerous environments. When your fuel truck is exposed to the unpredictable hazards of the wild, it must have enough stability. With our ROPS tested diesel fuel tankers, you can handle any situation with ease and safety by providing extra protection for all those inside.

Mine Spec Customised

We know mining safety can be a complicated matter. That's why Plantman provides customised Mine Spec vehicles for all sites demanding different requirements so that you can be assured that your employees and cargo will be safe from any dangers on the job. Our diesel refuelling trucks come with particular mining specifications, depending on where you are in Australia or what type of mine you operate.

BENEFITS OF DIESEL FUEL TRUCKS

Plantman's Diesel Fuel Tankers are the perfect way to manage your fuel needs onsite. With our safe and well-managed system, you can improve operational control as well as generate an excellent return on investment.

Your business will never have to worry about the reliability of its fleet again with Plantman's high-quality diesel fuel tankers. With a selection that includes different sized tanks, you're assuredly covered no matter what your requirements are.

With a wide range of well-equipped and high-end vehicles, Plantman offers benefits to its customers that you don't want to miss.

Effortless Operation

Transporting fuel has never been easier. Make transporting fuel easy with fuel trucks. The easy-to-operate Diesel Fuel Tankers by Plantman are perfect for anyone who needs to transport large amounts of fuel. Features like automatic transmission and zero spillage concept make the usage of the Diesel Fuel Tankers effortless.

Reduced Vehicle Off-site Downtime

Operations halted because of a lack of equipment and resources is never a pleasant experience. Not only are you wasting time, but also money. Plantman's Diesel Fuel Tankers help you avoid downtime caused by the unavailability of fuel in remote areas, which happens all too often.

Safety Focused

We make sure that all vehicles meet strict safety standards before they're put onsite. All our vehicles go through rigorous testing to maintain safety standards. Plantman's Diesel Tankers are built to meet the safety needs of both drivers and other site workers. We can even customise a vehicle specifically for your company according to your safety requirements, if necessary.

APPLICATION OF DIESEL FUEL TANKERS IN AUSTRALIA

Diesel fuel tankers are the answer to all your onsite refuelling needs. We're tough enough to go anywhere you need us. These fuel trucks are typically used in the following industries:

- Mining
- Construction
- Earthmoving

With their hazard reduction design and sturdy built up, Diesel Fuel Tankers can be used on any mining site. They keep construction operations running smoothly without compromising productivity or safety standards.

PLANTMAN'S FUEL TRAILER FOR SALE

In addition to Diesel Fuel Tankers, Plantman houses a Diesel Fuel Trailer that is smaller but sturdy enough to get the job done. You can use this portable trailer to transport fuel where heavy fuel tankers can't reach. The Fuel Trailer can be attached to any vehicle and transported to the most remote locations and sites to refuel your industrial equipment.

THE BEST DIESEL FUEL TANKERS FOR SALE IN PERTH

We're proud to bring the best fuel tankers for sale in Perth and all of Australia. Our trucks are suited for making oil deliveries to any remote location for mining, construction and earthmoving businesses. Plantman's Diesel Fuel Tankers are also available for hire if that's more suitable for your business. Remember us for any kind of service like repairs, modifications, refurbishments, etc.

Take a look at what we can do and talk to us about how our products and services benefit your industrial needs. Our team of experts will collaborate with you to make sure your fuel tanker is customised to meet your specific requirements. Reach us via email or simply **call** us on **08 9274 7820**.

YOUR TRUSTED PARTNER

RAPID SUPPORT

With a team of full-time support and service professionals, Plantman Equipment can rapidly respond to and action your enquiries. The company's dedicated Parts and Purchasing Division provides high levels of product and parts knowledge and the ability to same day ship most major components.

Plantman customers receive regular contact and site equipment inspections, together with on-site technical support where necessary.
